

2017 SPRING FINANCIAL GROUP SPRING CYCLE

Sunday 15 October

The 2017 Spring Financial Group Spring Cycle, proudly produced by Bicycle New South Wales, is returning on Sunday 15 October.

Starting from St Leonards Park in North Sydney, over 10,000 riders will make their way across the Sydney Harbour Bridge to either Pyrmont or Sydney Olympic Park.

Road closures

For the safety of the thousands of riders significant road closures will be in place from 4am to 11am along the event course through North Sydney, the Sydney CBD and Pyrmont. Some roads near the finish area in Pyrmont will be closed until 11.30am.

Major closures include four lanes on the Sydney Harbour Bridge, the Cahill Expressway over Circular Quay and a section of the Western Distributor. There will be no direct access to the Sydney Harbour Bridge or King St off-ramp from the Anzac Bridge while the Western Distributor is closed – citybound traffic will be diverted via the CBD.

Closures may impact how you access your parking or property as well as bus services through closure areas, so please consider this information carefully when planning your movements on the day.

Special event clearways

Special event clearways are 'no parking' zones and apply even to those with local resident or mobility scheme parking permits. Clearways will be in effect on sections of the event course between 3am and 11am. Vehicles left in marked clearways will be towed and a fine applies. Check signs carefully when parking on the day or the night before.

If your vehicle is towed
call **132 701** to find
its new location

Watch for cyclists

From Pyrmont to Sydney Olympic Park riders will be sharing the roads with vehicles under normal traffic conditions. Motorists are reminded there will be an increased number of cyclists along the course and to take extra care on the roads, especially when reversing out of driveways or turning in and out of side streets.

Increase in cyclists on shared paths

Spring Financial Group Spring Cycle participants will use specific shared paths between Parramatta River and Western Sydney Parklands.

These shared paths will see significantly increased usage. Please take note of the paths affected and use a different route or delay your travel along these paths where possible.
