# June 2012 Water Quality Summary Report

## Barangaroo South

This report has been compiled to summarise results of water quality monitoring at Barangaroo South during June 2012 in accordance with [EPL number 13336](#). This data is for samples taken from 1 to 30 June 2012. The data was provided to the Barangaroo Delivery Authority (the Licencee) on 20 July 2012.

Lend Lease conducts water quality monitoring at Barangaroo South to measure water quality and assist the construction team implement appropriate environmental controls on site.

Water quality monitoring is carried out in accordance with all relevant authority and statutory requirements. Ambient monitoring in Darling Harbour measures conductivity, pH, temperature and turbidity. The water treatment plant discharge point is monitored for a variety of parameters including volume.

### Location of water quality monitors

Ambient water quality monitoring devices are positioned at three locations within Darling Harbour as shown below. The location of the water treatment plant discharge point is adjacent to the Nearfield 1 location.

*Approximate locations of water monitoring equipment*

These locations correspond to the following licenced monitoring locations:

Water Discharge Point 1:	EPL Point 1
Nearfield 1:	EPL Point 2
Nearfield 2:	EPL Point 3
Background:	EPL Point 4

### June monitoring results

During the month of June, there were no exceedances of water quality criteria for ambient monitoring in Darling Harbour or monitoring of WTP discharge.
