January 2013 Water Quality Summary Report

Barangaroo South

This report has been compiled to summarise results of water quality monitoring at Barangaroo South during January 2013 in accordance with [EPL number 13336](#). This data is for samples taken from 1 to 31 January 2013. The data was provided to the Barangaroo Delivery Authority (the Licencee) on 20 February 2013.

Lend Lease conducts water quality monitoring at Barangaroo South to measure water quality and assist the construction team implement appropriate environmental controls on site.

Water quality monitoring is carried out in accordance with all relevant authority and statutory requirements. Ambient monitoring in Darling Harbour measures conductivity, pH, temperature and turbidity. The water treatment plant discharge point is monitored for a variety of water quality parameters, and volume.

Location of water quality monitors

Ambient water quality monitoring devices are positioned at three locations within Darling Harbour as shown below. The location of the water treatment plant discharge point is adjacent to the Nearfield 1 location.

Approximate locations of water monitoring equipment

These locations correspond to the following licenced monitoring locations:

Water Discharge Point 1:	EPL Point 1
Nearfield 1:	EPL Point 2
Nearfield 2:	EPL Point 3
Background:	EPL Point 4

Monitoring results

During January 2013, there were no exceedances of water quality criteria for ambient monitoring in Darling Harbour or monitoring of WTP discharge.
