# June 2016 Air Quality Summary Report

## Barangaroo South – Remediation Works

This report has been compiled to summarise results of air quality monitoring at Barangaroo South in June 2016 in accordance with [EPL number 13336](#). This data is for samples taken from 1 to 30 June 2016. The data was provided to the Barangaroo Delivery Authority (the Licencee) on 21 July 2016.

Lend Lease conducts continuous air quality monitoring at Barangaroo South to measure air quality and assist the construction team implement appropriate environmental controls on site.

Air quality monitoring is carried out in accordance with all relevant authority and statutory requirements. Monitoring parameters include particulate matter less than 10 microns (PM10), total solid particles (TSP), metals, polycyclic aromatic hydrocarbons (PAHs) and volatile organic compounds (VOCs).

## Air quality monitoring locations

Air quality monitoring locations are located as shown below:
