PROJECT APPROVALS FOR BARANGAROO RESULT OF MONTHS OF CONSULTATION AND ASSESSMENT

The project approvals for Barangaroo issued today are the result of months of consultation, design development and assessment, the Barangaroo Delivery Authority said today.

The applications for Barangaroo were lodged from February to October 2010, with a modification lodged in November 2010, and are a result of the Part 3A planning process, including a public exhibition period.

The Barangaroo Delivery Authority has held more than 100 meetings with community groups, key stakeholders and interested parties on the design and contents of these applications, and much of the feedback resulted in significant improvements for Barangaroo.

The design application for the Headland Park Main Works was a robust year-long process, including refining the details as a result of community feedback, in particular an open day held on-site to encourage the community to have their say.

Key dates of these applications is below.

Main Works for Headland Park and Northern Cove
