Foreshore walk remains open with protection diversions – *Barangaroo Delivery Authority*

9 August 2010

A series of temporary diversions have been developed to protect users of the Barangaroo Foreshore Walk and at the same time maximise public access to the harbourfront during necessary construction works.

The current diversions are expected to be in place for the next month to allow a range of works by Lend Lease to occur on Barangaroo South.

These include continuing geotechnical investigations requiring drilling on site as well as the demolition of the former passenger cruise terminal at Darling Harbour 8.

Signage has been placed on site which clearly show the temporary routes established to protect users of the foreshore walk.

The map below also shows the access points to the Barangaroo Foreshore as well as the route of the diverted foreshore walk in red.
