January 2018 Water Quality Summary Report

Barangaroo South – Remediation Works

This report has been compiled to summarise results of water quality monitoring at Barangaroo South in January 2018 in accordance with [EPL number 13336](#). This data is for samples taken from 1 to 31 January 2018. The data was provided to the Barangaroo Delivery Authority (the Licencee) on 19 February 2018.

Lendlease conducts water quality monitoring at Barangaroo South to measure water quality and assist the construction team implement appropriate environmental controls on site.

Water quality monitoring is carried out in accordance with all relevant authority and statutory requirements. Ambient monitoring in Darling Harbour measures conductivity, pH, temperature and turbidity.

Water quality monitoring locations

Water quality monitoring locations are located as shown below:

Approximate location of water quality monitoring equipment

Legend

-  Ambient Water Quality Monitoring Location
-  WTP Water Discharge Point
- X EPL point number

EPL Point 10 is the Nearfield 1 (NF1) location, and EPL Point 11 is the Nearfield 2 (NF2) location. EPL Point 13 is the discharge point for the Interim water treatment plant (WTP). EPL Point 7 is the discharge point for the Crown Development WTP.

Monitoring results

WTP Discharge

During January, the Water Treatment Plant treated and discharged 985 kL of water to EPL Point 13.
