

Barangaroo Remediation

20 November 2018

Removal of Odour Control Enclosures (OCEs)

The remediation project on the Barangaroo site is complete and work will soon commence to remove the Odour Control Enclosures (OCEs - remediation tents).

Work will start from **26 November 2018**, and is expected to take approximately four to six months to complete.

The work will be carried out during standard work hours, between 7am to 6pm from Monday to Friday and 7am to 5pm on Saturdays.

There will be some road lane closures required for this work. Once dates are confirmed you will be notified accordingly.

We do not expect there to be a high level of noise associated with this work.

Please note that there will be odours generated during the removal of the OCEs. We will continue the strict monitoring of the Barangaroo remediation site to monitor for air quality, dust and odour. This work will continue to operate in accordance with our management plans that ensure the health and protection of residents, the general public, our workers, contractors and the environment.

As the OCEs are removed, the next stage of work to construct the basement for the One Sydney Harbour residential development will commence.

Work to remediate Hickson Road continues and is due to be completed in early 2020.

There will be no construction work between Saturday 22 December and Tuesday 1 January. We will return to work on Wednesday 2 January.

More information

Thank you for your patience during this important work. For further information, please contact a member of the team.
